

**O08-19                      Systemic Autoimmune Diseases**

**'Dirigido' por:              Guillermo Ruiz Irastorza**

*Medicina*

*UPV/EHU*

**Lugar de                      Palacio Miramar, P<sup>o</sup> de Miraconcha nº 48. Donostia / San Sebastián**  
**celebración**

**Idioma/s oficial/es      Inglés**  
**de la actividad**

**Objetivos de la              To update the diagnostic process and clinical management of the different**  
**actividad                      SADs.**

To remark the importance of multidisciplinary team work.

To discuss with the attendants real-life clinical cases with an eminently practical approach.

**Resumen                      Systemic autoimmune diseases (SAD) continue to be a big challenge for**  
**clinicians, given their complexity, clinical variability and potential impact in the**  
**life of patients, many of them young women.**

Over the last 4 years, the Autoimmune Diseases Units from Cruces and Bordeaux University Hospitals have established a collaborative clinical and research program, including joined Lupus-Cruces and Lupus-Bordeaux research projects and annual Basque Lupus Seminars at Baiona.

Last 23<sup>rd</sup> July 2018 we jointly organised with Euskampus and the University of the Basque Country the Summer Course **Enfermedades Autoinmunes Sistémicas / Systemic Autoimmune Diseases**, with 92 attendants from both sides of the border.

Taking into account the good performance of the activity, the high number of students and their qualifications of the course, we would like to organise the second edition. We aim to offer an eminently practical focus and to remark the importance of a collaborative multidisciplinary approach, concluding with the presentation of real-life clinical situations from our two Units with and interactive approach.

This activity is included in the cycle "**Health, a commitment to people**" that is developed in collaboration with the Department of Health of the Basque Government and Osakidetza, which offers reduced fees (75% discount on advance rate) and is especially aimed to the training and updating of professionals of the public health of the Autonomous Community of the Basque Country. The assistance program is pending approval so if you are interested in receiving a notification as soon as the reduced rate is activated, please click [here](#).

## Programa
